

## MADE TO MEASURE

Scottish furniture manufacturer, Dovetail Enterprises, has launched a new range of contemporary hotel bedroom furniture, designed for the best hotel bedrooms. The Alto range of furniture is made to measure by experienced craftsman using traditional skills, coupled with state-of-the-art equipment. The design and quality makes Alto ideal for the luxury hotel market, while the price makes the range affordable for smaller hotels looking to refurbish one or two superior rooms. While Alto is available as an all-inclusive package, clients are free to select individual items to fit with their own design concept. Each item can be tailored to meet individual room layout, with a wide choice of veneers to match any colour scheme.

## SUMPTUOUS SIENA SEATING

Launched to a great reception, the new Siena range of sofas and chairs from Whitehead proved to be one of the most successful designs introduced at the Interiors Exhibition in January. This sofa makes an immediate impact, with its deep-buttoned back seat and arms and eye catching base stud detail. A choice of stud colours is offered adding the right effect to whichever fabric is selected. The polished tapered wood legs add that final touch that resulted in the Siena receiving many accolades when viewed for the first time. Siena now joins the well-respected family of Whitehead products that have been manufactured by the family owned business from their Nottinghamshire base for over 30 years. This respect has been earned by the making of quality furniture for decades.

## FUSING FUN AND FUNCTIONALITY

The Fusion table is a sleek contemporary dining table for 10 people and a quality pool table all in one. Convertible in seconds, the Fusion table transforms from a designer dining table into a high quality billiard table, but the innovative design ensures with the top on no one would believe there was a pool table under the dinner plates. The 7.5 feet table is available with a stainless steel or lacquered frame with a choice of beautiful veneers for the top and table surround and 14 cloth colours to truly customise the table to your preference. Build quality is exceptional using a single Italian slate bed, high velocity rails and Velocity PRO worsted cloth all put together by passionate artisans at the Aramith headquarters. All balls, cues and triangles are stored under the top when not in use. The Fusion table was officially launched in the UK at the Interiors UK show in Birmingham at the beginning of the year.
